many they remain as a weight slung round the shoulders of the original pioneers. The THE cotton mill industry has not turned Yahloong Company, finding all hope of escape cut off, and an appeal to the shareout in North China to be the mine of wealth hoiders unfruitful, has unfortunately been that was somewhat too fondly looked forward compelled to see its property placed on the to by its originators. The pioneers have, market with little hope of its realising much in fact, found the usual result—that they above the mere value of the land and have had to pay dearly for their experience materials. The other company, with better and that they, who had the courage of their convictions and started an enterprise | few months not only paid its interest out of earnings but being in a position to reduce fraught with benefits to their kind in the not its indebtedness some six per cent., is offerdistant future, have themselves had to bear the quips and slings of outrageous fortune. ing debentures to its shareholders and One, the Yahloong Cotton Mill is so hope- others to the amount of half a million taels. lessly embarrassed that its chief creditors | The new capital, share and debenture, would have insisted on selling the affair by public thus amount to 1,128,800 taels. On the auction, while the International Mill other hand, the amount spent in land, buildacknowledges the loss of one fourth of its ings and plant-acknowledged to be in percapital and straightly informs its share- fect order and of the most suitable natureholders that only by facing the loss can less the 70,000 proposed to be written off, it hold forth any hope of being able to would be 1,070,000 taels. As in the prostem the tide of misfortune. That the fitable portion of the year past the company directors of these companies were to blame succeeded in making a profit in all of 38,000, for taking too sanguine a view at the begin- and may reasonably expect a good deal more ning of the enterprise, without waiting to see when business becomes again regularly esits first results, goes without saving, and they tablished, it seems to be fairly probable that the shareholders will obtain a reasonwould be now the first to acknowledge the fault. Most men can be wise after the able return on their reduced capital within event, but it is only fair to say that at the a not long extended period. Should nothing time the sky was clear; and even the wisest unforecen occur-and indications are on the failed to appreciate the signs of the coming | whole favourable—the new industry may tempest. Even at the beginning there were, be considered as passed its teething time, however, difficulties which the experience of and we may look forward to the manufacthe past might have anticipated. The capital ture of cotton in China as a permanent of the mills is largely Chinese, and anyone industry of the land.

The German gunboat Tiger left on Saturday might have anticipated that, being so, the for Pakhoi. Chinese would might and main have striven for the success of the various undertakings. The Harbour Regulations for the forthcoming It is, however, one of the characteristics of V.R.C. Regatta are published in the Gazette. the Chinese that no matter how much they have at stake they are readily led away by the chance of an immediate profit. True to this instinct, and momentarily forgetting how much they had at stake, they were not loth to corner the cotton market. A wiser and clearer-headed race would have seen that thereby they were working against their own permanent interests; but when

did such wise ideas ever enter a Chinese

head? It was far more consonant with

Chinese modes of thought to have a good

gamble before entering on the steady work

of manufacture; and the good gamble they

were determined to have. So much might

have been foreseen by the European manage-

ment at the beginning, and probably was, but

they were too much committed to the

various schemes to seem to seek to throw

cold water on them, and hence the first

earnings were divided, and no expense

many respects they were right, even though

this had to be done at a sacrifice; and it is

certain that as yet no one had any reason to

expect the political whirlwind that in a few

weeks bade fair to undo in China the work

and the struggles of nearly sixty years.

But if the ordinary Chinese merchant dearly

loves a gamble, and cannot, even when know-

ing that in the long run he must lose by it,

refrain from taking a hand, he has also a

very good idea when he settles himself down

to business of making the best of the situa-

tion; and the directors of the various

companies did not hesitate to build on

this hope. Other industries, as silk and

sugar, have had the same difficulties to sur-

mount, and have surmounted them success-

longer than the original founders of the

industry anticipated. They were not, how-

stances it is an expensive matter to close even

shut down under the circumstances seemed

that they were being run at the expense of

capital, and that none, if they escaped at

all, could hope to do so without a very

serious readjustment of their capital ac-

counts. On the other hand it is well to

for their requirements. The Yahloong Com-

pany, with a paid up capital of five hundred

and seventy thousand taels, spent on its land

and plant seven hundred and thirty-six,

while the International, with a capital of

eight hundred and forty; spent eighty thous-

and over the million. This, however, is, it

need hardly be said, the besetting sin of all

China undertakings-indeed it may be said

of such undertakings over the world. In a

few cases, exceptional causes at the beginning

en ble such a company to overcome early

these preliminary difficulties, but in too

start up to the most perfect condition.

A rather serious outbreak of fire occurred on Saturday afternoon at 189, Queen's Road West, in premises on the ground and first floors occupied by a dealer in medicines and miscellaneous goods. The fire, which spread rapidly, gutting the first two floors and partially destroying the second, was caused through the overheating of a medicine-drying stove. The stock of the medicine-dealer was insured for \$21,000, and the loss will probably be covered by this sum. The damage to the second floor, where a quantity of jewellery was destroyed, is estimated at \$1,400, and is, we are informed, uncovered by insurance.

A proclamation of the Shanghai mandarin has been issued informing the public that orders have been received from Governor Nich of Soochow, to introduce into Shanghai, in the near future, copper ten-cash pieces (Tang-shihtetien), now being coined in the cash mint at Soochow. These ten-cash, or cent pieces have already been introduced into circulation and Canton and Wuchang, with varying success and the people in Shanghai have also been prospects of success, having within the last informed that they are to be allowed to use these ten cash pieces, in the proportion of onehalf ordinary cash and one-half tor cash pieces, in paying land taxes and lekin duties.

At noon on the 23rd ult. there returned by the American mail from Hongkong the cricket champions of Shanghai. At the most-head the launch Victoria floated the flag of the Shanghai Cricket Club with that of the Hongkong Cricket Club below it. Before the tender [lished partly by subscriptions from local officials was made fast, the N.-C. Daily News records. three ringing cheers and a tiger were given by the large crowd on the pontoon and the lawn adjoining, and the greetings of the victors their friends and admirers were hearty and prolonged. On the same night some sixty of their friends entertained the team at dinner at the Shanghai Club, the veteran cricketer Mr. A. P. Wood being in the chair. Mr. Wood proposed the health of the winners, Mr. Farbridge, the captain, replying for cricket, Mr. White for tennis, and Mr. Lanning for swimming, and with toast and song a very joyful evening was spent. Our Shanghai temporary expresses its gladness that there is no foundation for the story of the improper handling of the ball by Mr. Lanning when batting in Shanghai's last innings v. the Straits.

A special Seoul desputch to the Osuka Mainichi dated the 19th inst. says that a despatch from the Governor of Kan-Kiang-do states that Russians are sending telegraph poles from the Amur with the object of constructing a line between the Amur and Chingking, but the Governor is unable to prevent the transportation. The report states that Russia has not yet obtained the approval of the Corean Government.

News received in Manila from Honolulu says the U.S. War Department has lately decided that hereafter transports will not stop at Honolulu unless there is a special object in having them take that route, such as the shipping there of supplies of men. The plan of the Department is to try sending the ships by the great circle toute, as the largest vessel in the transport service can carry enough coal to make the complete trip without encroaching too much upon the cargo space.

The Echo de Chine states that at the meeting on the 23rd ult. of the representatives of the principal French importing houses at Shanghai on the invitation of the Consul-General, M Ratard, the latter announced the formation of Commission, which will sit at Shanghai under his presidency, to assist in the establishment of of the new Customs tariffs. This Commission will consist, in addition, of the Commercial Attaché of the Legation at Peking, an Inspector of Customs from the Indo-Chinese Service, and two importers. The merchants present elected as their representatives Messrs. Toche and

The Manila Times of the 23rd alt. says:-Although the report could not be confirmed yesterday, it is announced on very good authority that another official interested in market prices for government departmental requirements will follow the example of the Insular Purchasing Agent, and go to place hi orders for the necessary supplies of his department in Hongkong. It is claimed that a saving of from 75 per cent, up can thus be effected. These cases are entirely experimental; but it they prove satisfactory there will, in all probability, be a permanent arrangement made for shipment of certain classes of supplies from Hongkong to these islands by government officials. This action on the part of the anthorities will probably still further increase the dissatisfaction felt by the local merchants, who claim that the government should patronise those who so largely contribute to its support.

It is reported from Nanch'ang (says the N.-C Daily News) that much dissatisfaction is being felt in that city owing to the high charges demanded at the semi-officially established schools of Western Learning, i.e., schools estaband partly by wealthy members of the gentry of Nanch'ang. The consequence has been that only youths belonging to the gentry and wealthy merchants can afford to avail themselves of the educational—mainly in the English language-facilities offered by these schools, while the children of families of slender purse are debarred from entering them. To meet this want certain of the Nanch'ang literati have decided to invite foreign-educated young men to come to Nanch'ang to open private schools, where the common elementary branches Western Learning in the English language will be taught at the rate of three dollars per mensem for each scholar. A pioneer school hes already been begun by a young foreigneducated gentleman at Nanchang "on his own hook," the success of which has led the literat. to start the above scheme.

Generals Smith and Hughes are said to disagree as to the right policy to be pursued in Samar, the latter favouring negotiations and the former strenous methods. Negotiations are proceeding for the surrender to General Hughes of the Filipino General Samson, which will wind up the revolt in Bohol, where Samson the acknowledged insurgent leader. Meanwhile a gallant storming of a stockade by the 19th U.S. Infantry is reported from Bohol. The insurgent position consisted of fourteen forts, surrounded by large trenches and rifle-pits. The main fort was surrounded by a precipico, the only entrance being guarded by a stockade. This stockade had a line of trenches behind it and the whole defence was carefully defiled from mer position and driven the insurgents out. After securing a plan of the insurgent stronghold, Captain Lawton sent two sergeants of the 19th Infantry with a force of twenty men to climb the hill at the left of the stockade. MACAO. FROM OUR CORRESPONDENT.

Macao, 28th November.

ARBIVAL OF THE "APRICA." One gun fired at 1.40 o'clock last night signalled the arrival of the troopship Africa from the Portuguese metropolis. Simultaneously, a bright rocket was observed by those on shore to shoot high up into the air of the dark night; a vessel was then descried in the distant offing. Presently there was no mistaking the identity of the Africa; she turned her searchlight full on to the shore from and to end of our charming explanade, now elethed in the perfect darkness of night. The Portuguese troopship left Lisbon on the 15th October last, the send-off being attended with more than the usual ceremony. Shortly after noon of that day, the expeditionary force (consisting of 335 men of all ranks), headed by the maral band playing the Portuguese anthem, arrived at the arsenal buildings and, moored to the Quay, was the Africa in waiting ready to receive her freight of Portugal's brave sons and true. In spite of the bad weather then prevailing a large econcourse of people had assembled to wish the mon God-speed. Not long, after the secretary; the Director General for the Colonies, Dias Casta, Vice-Admiral Rio de Carvalho, Cyprian Lopes de Andrade, and other distin guished personages. They were received on deck by Capt. Luiz Antonio Apra, commander of the troopship, and lst Lieut. C. duereiro, second in command. After the ex .arge of formal courtesies, the Officers of ... ite just mentioned bade farewell to Majo. Joaquim José Bragança (Commanding the L. peditionary Force) and his men. Then amid enthusinstic cheering of the populace the Africa gracefully steamed away from her moorings down river on her eastern journey. She touched on route Port Said, Aden, Colombo, and Singapore, anchoring off Macao Roadway at twenty minutes to eight o'clock last night,

thus taking 43 days to complete her voyage.

number of people, including some hundreds of Chinese, gathered together in Prais Grande, that section of which extending from the Post Office to San Francisco presented quite an animated scene of sager spectators waiting for the disembarkation of the force. It was not until one o'clock that a launchwas sighted steering landward from the direction of the troopship in tow of two large junks, followed by two others. In these native crafts the men were transported from the vessel ashore. It seemed a little unbecoming that the disembarkation of the soldiers was not effected by some more dignified means. Their conveyance by steam-launches would seem to be more in keeping with the times and a little less in imitation of native methods of transport of their "braves." The Chinese are a race preeminently susceptible to outward show. Any assimilation of their ways might be misconstrued by them for equality if not inferior ty. A the ruling power here the Government should lose no opportunity to impress upon the native minds the strength of its military forces. The junks were towed for quite a long distance, the troopship lying far out in the roadway, and as far as could be observed no awnings. of any description were provided on board the junks. But for tue coolness of the weather some discomfort might have been felt by those on board these vessels under the rays of the sun at that hour of day. There is a consensus of opinion that, much as the men at present doing garrison duty here are admired for their fine physique and soldierly qualities, the newcomers do not suffer by comparison. They were given a right cordial welcome to Macso. The men as a body can be considered as amongst the best in the Portuguese army. They are all young and robust. Major Braganca is surely to be congratulated on the extremely favourable impression which his men have created on their landing. Besides a photo of the Commanding Officer and his A.D.C. (Alferes Santos) O Seculo of the 15th October last reproduced also the likeness of Capt. Frees and Alferes Mira, both of whom are attached to the force. THE BOA VISTA-ANOTHER ST AY. On det that by private treaty the Bon Vista Hotel has been leased to a syndicate of two gentleman by the direction of the Santa Casa for a period of one year. The rent payable is, so rumour gives it, \$3,000. The report is almost generally believed in and has formed the subject of more or less adverse criticism on the unwisdom that can dictate such a step on the mand, on the principle of "set a thief to catch part of the Santa Casa directorate—a body of a thief." Canton, 3.th-November. THE BURNING OF THE "FUSHUK."

A court of enquiry into the burning of the Fushun was held on Wednesday, under the presidency of the Captain of H.M.S. Firebrand. arrival of the force came the Minister of Nothing was discovered as to the origin of the Marine accompanied by his adjutant and private fire. One charred corpse was discovered on board, and a certain, or rather uncertain, num ber were drowned. The engines were practically undamaged. Some favour is given to the theory that the fire was caused by incendiaries, who hoped in the confusion to be able to decamp with a quantity of bullion which had already been shipped, and the advocates of this theory point out that the ship appeared to catch fire in two places simultaneously. The rumour of the burning of the Manchu examination papers turns out to be incorrect. The usual procedure is for the examiner to take them back with him on his return to Peking, where they are looked over. This year the Governor took the unprecedented step of sending them overland Kaifeng-fu, with what has proved a fortunat result. The rest of the examiner's personal effects, valued at several thousands of pounds, From an early hour this forenoon a large have been destroyed. The examiner himself had gone the day before to Hongkong, where he was awaiting the arrival of the steamer.

H.E. THE VICEBOY. The Viceroy's health continues to improve and no immediate anxiety is felt. H.E. is being attended by Dr. Swan, an American doctor residing in the city.

A RUMOUR A rumour as yet unsupported is current that a new governor is shortly to come here. This is to be the present governor of Hupeh, the nephew and namesak of Prince Tuan. He is supposed to have been appointed with a view of thwarting the pro-foreign policy of Chang Chih-tung, but to have found that that astuto official was quite alive to this and managed to leave the governor very little power of any sort. Therefore, it is said, he has petitioned to be transferred elsewhere, with this result.

THE TUNG MAN KOON EXAMINATION. The triennial examination of the Tung Man Koon is being held to-day. The Tartar General attends in person, and the candidates are introduced one by one in court dress. Success entitles the scholar to the grade of B.A., with the additional advantage that he may proceed to compete for the M.A. examination in either the Manchu or the Chinese languages. As the school is mainly recruited from the Manchus this option is a real benefit. At the recent M.A. examination one of the successful candidates was a pupil at this school, while five of those Manchu candidates whose papers were not burnt on the Fushun are members of it.

OUR BURGLARY SEASON. The approach of winter marks the burglary season in Canton. Last year most of the principal streets formed themselves into peace guilds and hired extra watchmen and soldiers to protect them during the winter. The Pun Yu and Nam Hoi magistrates have now summoned the leading shopkerpers and requested them to take steps to repeat the precaution.

GOLD MINES. A delegate has been sent to Fa Yun, a village in the neighbourhood, to re-open the gold mines there. They have long been known to exist, and were worked for a time under the viceroyalty of Chang Chih-tung. It was discovered; however, that working them ruined the fung shui of the neighbourhood. The villagers drove. away the miners and soldiers who were sent protect them, and the enterprise was given up. It is hoped that it will now be more successful, and that increased foreign intercourse and the lapse of years may have made the villagers less superstitions.

A CHIVALBOUS CRIMINAL. At the same village of I'a Yun a case of chivalry has met with a hard reward. There was a certain pointent thiof who made confession of his sins, and was rewarded, as is not uncommon in China, with a small military comtions, if any, have pressed upon the deliberations | escaping with a few dollars apiece in token of of the Santa Casa Board to alter so radically a his gratitude.

VLADIVOSTOCK NOTES. [PROM OUR COERESPONDENT.]

Vladivestock, 18th November. THE SITUATION IN NORTHERN MANCHURIA. The clearing of Northern Manchuria from bands of marauders, ex-Boxers, and Chinese ex. soldiors, is being gradually accomplished. From the 5th October to the 4th November 402 exsoldiers surrendered near Girin, 240 near Kuachen-si, 156 near Ninguta, and 133 at different other places; a total during August and September of 644 men; and during the June expedition of General Kaulbars, 631 more, aggregating in all 2,216 ex-soldlers and Boxers, of whom the most trustworthy ones were delivered to the Chinese Dzian-Dzuns to serve in the native police force; some were banished to the interior of China, and some to their native places. The general situation in Northern Manchuria is so reassuring that it has been found possible by the Russian authorities to hand over the pursuit of the remaining outlaws mostly to the native police force, and Russian troops are now to be only summoned in cases where the Chinese police force does not prove sufficiently strong to cope with the bands.

A KAMCHATKA VOLCANO. During the month of July last, beginning on the 7th and ending on the 22nd, there were constant eruptions of the Tvatch volcano on the Kamchatka peninsula. A terrific rearing underground noise preceded the eruption, which was heard, as it has now been learned, for nearly 100 miles in every direction. The eruption lava began on the 7th July and continued till the 13th, when the flery streams of lava became extinguished and the eruption of colossul columns of vapour began. The lava has flowed into the rivers, poisoning the water, and a great number of fish that came into them turned back to the sea. A great many dead fish could also be seen floating in the rivers and sea. fine volcanic dust covered every tree and the en tire undergrowth and grass in the whole of southern Kamchatka. The inhabitants, while breathing in this dust, have all become affected by a strange cough. An earthquake lasting several minutes was felt throughout Kamchatka on 9th July, doing much damage to houses, etc.

AUSTRIA AND ANGLOPHOBIA.

In connection with Renter's telegram of the 25th inst. stating that "the Gorman spitation against Mr. Chamberlain has not the faintest echo in Austro-Hungary," the following remarks by the Vienna correspondent of the Times on the 20th October are of interest :- It is impossible to pass over in silence the fresh outbreak of rabid Anglophobia in a certain see ion of the Austrian Press. This time it is not the leading Germanophile organs which have resumed the campuign of misrepresentation and slander against the British Army in South Africa. Not that they have made any effort to enlighten the public as to the real state of affairs, but for the present they confine themselves to lecturing and advising England, as did the Fremdenblatt a week ago, and to restrospective comment on the military aspect of the war, as does the Neucs Wiener Tagblatt in a special article to-day. Those journals which now viciously assail British honour and Englishmen's sense of humanity are the principal organs of the Clerical and Anti-Semitic parties in Vienna. It is well that this should be known in England. The leading article which appeared this parison with the outrageous anti-English distribes of the Vatican monthpiece La Croix.

Kitchener as Hangman," and runs thus :-

"The Commander-in-Chief of the British troops in South Africa, in despair at not being able to conquer the Boers by honest war, has long had recourse to excessive brutality. Until recently a remnant of shame on the part of the English Government restrained the bloodthirstiness of Lord Kitchener, but since the beginning of this month he appears to have brings fresh tidings from South Africa. With Constable Boon and a posse went up to Lott's cruelty is necessary in order to save British been burned, but a white man will be next." seed which has been sown by Lord Kitchener will produce a harvest of blood, and nobody can blame the Boer commanders if they have recourse to terrible retribution."

The article concludes with an extract from the wild fire, and yesterday over 1000 armed men protest handed by a committee of Boer women had reached the scene of battle. They came in Pretoria to the resident Consuls-General. The Deutsche Zeitung, which is the chief organ of the Vienna Anti-Semites, heads a leading article on the same subject with the replies came that troops would be hurried to title of " Heroes and Murderers." It refers to the scene, but this was not necessary. a recent speech of the Duke of Argyll's on the occa ion of a distribution of war medals, when the Dake remarked that it was the business of Englishmen to bring to the Boers justice, civilisation, and enlightenment. The writer says - No; it is not the higher interests of c.vilisation which during the last 50 years have caused England to draw the sword in Central Asia, in the East, and now in South Africa. But, as a Russian contemporary justiy observes, it is for quite different and low motives, upon which we ourselves have frequently dwelt. It is not for the s, read of civilisation but in the interests of rascals of the Stock Exchange that this war is carried on. The very same man who now plays the role of hanguian in the service of these grabbers stated shortly before the outbreak of the piratical campaign that war in that Transvaal was an men-sense and with the views of all people of trouble.

TERRIBLE RACE WAR IN LOUISIANA.

A telegram from Balltown, La., on the 29th October, says:-- A race war started at a negro camp meeting at Duncan Chapel, on Sanday afternoon at 4 o'clock, resulted in a carnival of blood in the Pearl River valley unequalled in the history of the State. One white man is dead, another is new dying with a bullet hele through his stomach and a third is badly wounded. Nine negroes were killed in the bloody affray, five men, three women and one small child. A dozen, or perhaps more, escaped to the woods and swamps with wounds that are believed to be certain death in the brush away from medical care. No one is able to estimate the number of wounded negroes who escaped the carnage behind the church. They scattered to the four winds. Some are known to have been shot, but they have not been found. The morning in the most influential Catholic organ | fierce conflict raged for half an hour. Those in Austria-namely, the Vaterland-bears com- at a distance say the firing sounded like a pitched battle between troops. Negroes had come to the camp meeting from 200 miles all up and down the valley. Elder Stephen Dun-The Vaterland article is entitled "Lord can of New Orleans, for whom the chapel was named, was present. Last Thursday the meeting opened with several hundred negroes encamped around the church in tents and in rudely constructed shanties. It was to continue one week. Yesterday afternoon the nine negroes who were left where they had died, were piled into three unma-ked graves dug near, the charred remains of Lott's tent house. There was no ceremony. The missionary and his daughter filled one of the holes and the women and child another, the men a third. At the same time prominent citizens held a conference, which was attended by Sheriff Simmons, and a message was sent to the negroes. ..

"Do you want any more?" was the query.

"No," came the reply. The negroes have left the country. They carried all the personal effects possible. Those who could rode on horseback and in buggies, and those who could not ride took to the woods afoot. Those who were a little bolder ined the roads, getting out of the community. This afternoon all was quiet. The negroes are cowed undertaking which was inconsistent with com- and the whites believe there will be no further

THE SIBERIAN RAILWAY.

The Standard's correspondent, wrote on the 25th ult from Vienna:-The Politische Correspondence publishes an important statement which, in a way, supplements the Standard's Shanghai telegram about the new Manchuria Convention, and throws light apon Russia's present Asiatic policy. The inspired St. Petersburg correspondent of the Vienna news

sheet says :--"It is the intention of Russia to accelerate the construction of the Siberian Railways, the completion of which was originally planned for, 1905, so as to have this immense work finished next year. The motives for this haste are not only last year's events in China and the Russian occupation of Manchuria, but important political considerations. In the first place, there is the desire to postpoue indefinitely a conflict between Russia, Japan, and England, by establishing a military equilibrium between these Powers in the Far East. To gain this end, Russia must West by a line drawn from the most northern be in a position to concentrate a large military point of the Island to the Watering Pier at | force at Port Arthur with rapidity, which, without the completion of the Trans-Siberian

It is by no means certain that Russia could easily find the money for the completion of the Vessels and junks are prohibited from Railways next year; but her anxiety to get a through line to Port Arthur as soon as possible

elsewhere than in the Far East. When the great policy of Russia in the East was enunciated—that is, at the Accession of Nicaragua Canal can be built. The Panama the present Tsar-Prince Lobanoff, who best understood him, and grasped his ideas most sential for the realisation of his Imperial master's vast and almost visionary schemes. The first was no Russian entanglement in Europe, and no chance of one. In accordance with the necessities of this condition, Prince Fordinand was recognised as Ruler of Bulgaria, the Armenian massacres were ignored, the Balkan Convention with Austria was concluded; and even German encreachments in Asia Minor, formerly Russia's special province,

were tolerated, rather than that the nearer Eastern question should again be raised. Prince Lobanoff's second condition was that Ru sia should avoid any conflict in the Far East till she is strong enough to be confident of success; because he knew that, once defeated, whether in conflict with a single Power or a combination of Powers, the great Asiatic Empire which Russia wanted to carve out for herself was lost for ever. At that time it was seen that the completion of the Siberian Railways would count as a factor; but M. Witte, the Minister of Finance, undertook to provide the means for pushing on energetically with the work, and Russia's entire policy with regard to France was made subservient to M. Witte's plans for keeping the Russian Exchequer 18plenished, both for the railways and for constructing a new Navy for service in the Far East. Events in China forced Russia, much against her will, to proceed-at a quicker-pace than was originally intended, and to expose herself to immense risks. Especially inconvenient for her were the events of last year, which brought the forces of all Europe to the spot where she had meant to be left alone, and which compelled her, lest she should lose an opportunity, to occupy Manchuria prematurely, for it was felt that to defend the province except by the terrorism of Russian prestige would be almost impossible until the railway connection with European Russia vid Siberia was established.

In the meanwhile two great things have happened; the one favourable, the other unfavourable to Russian plans. The advantage to her is that England's war in South Africa, instead of being finished within a few months or a year, now has entered upon a third year. In Russia it is firmly believed that it would be most difficult for England to engage herself elsewhere for at least another year, and probably for two, especially as the Army has to be reorganised. The event unfavourable for Russian plans is that Japan has carried out her Naval programme; all the big warships she ordered abroad being now launched, and most of them already in Japanese waters; so that, could she be sure of England's freedom of action, Japan might any day throw down the gauntlet to the Russian rival and bid him clear out of Corea, out of Manchuria, and out of China altogether-all this, of course, only so long as the Siberian railways are not completed. Immediately they are completed Russia would be able to throw any number of troops into Manchuria, or thina, or Corea. English assistance to Japan would then come too late. It could no longer alter the fate of either China or Japan; and

Russia would be undisputed master. The Tsar and his advisers will look forward with eagerness to the day when the railways are completed. Every month diminishes the chances of the greatest political achievement any Power has had within its reach. If Paris was worth a mass, the whole of China, with Japan into the bargain, is certainly worth the patience Russia has now to display almost everywhere; superhuman patience, one might say, for she dare not quarrel with any Power, big or small. She must avert her eyes from whatever happens in Turkey, in the Persian Gulf, in Afghanistan, and even to interfere, and if possible to keep others from interference-prompted, as it doubtless was, in the first place, by his political honesty and his traditional love of peace-was no doubt also influenced, and rightly so, by Russia's own interests. These imporatively demand adherence to Prince Lobanoff's second conditionno conflict with anyone till Russia can be confident of success in the Far East; that is, till the Siberian and Manchurian Railways are finished. Had there been intervention in the South African War, whether by Russia or by others, there can be no doubt a general European war would have followed, in the shadow of which Japan could and would certainly have. created a situation in the Far East favourable to herself, and ruinous to Russia's ambitious and Polka to Peak Residents. plans for the present and for all time.

The greatest danger to Russia's plansnamely, attack on the Peking Legations-pageed off without detriment to them; and now the prescribed policy is to humour Japan and avoid a conflict with her, and to finish the railways. Hence the evacuation of Manchuria or, rather, the promise of evacuation within the next three years, under conditions which, without compromising the future, deprive Japan of the pretext for a quarrel. Hence the preparations for a big Railway Loan, most probably for the works

It is only necessary to look at the latest distribution list of the Russian Fleet to be convinced of Russia's apprehensions of what Japan may intend. In the Mediterranean, in the Atlantic, and in the Baltic, Russia has only single irondad, the Emperor Nicholas L, which the Wariak and the Duke of Edinburgh. The rest are only gunboats, torpedo-bosts, and the three Imperial yachts. Whatever else there is in the Russian Navy, the Black Sea Fleet excepted, is spread over the area between Port Arthur, Vladivostock, Nagasaki, and Shanghai.

THE ISTHMIAN CANAL.

A Washington despatch of the 2nd inst.

In view of the expected return to-day to the United States of Lord Pauncefote, and the immediate resumption of negotiations, which, in this case, are to put into the concrete form of a treaty the proposition agreed upon by the Governments of the United States and Great Britain, as a convention to replace the Pauncefete-Hay Treaty of last year, it may be proper to state upon the highest official authority, that there is absolutely no other question than that of the Inthmian Canal involved in the negotiations. Further, it is stated that no demand has been made by the British Government for any compensation whatever for the relinquishment of its joint right in the control of such a canal. The construction of the canal was considered by both nations a desirable thing for the world at large, and that thought was at the

bottom of the negotiations. According to a New York telegram of the same date, Mr. Andrew Carnegie, interviewed by a pressman that day on his arrival by the St. Louis, said :-

"I do not believe in a canal at all. I do not believe a canal will render the service for the transportation of goods that a first-class twotracked railroad would do. Freight could be unloaded into co-ton cars and loaded on the other side, at far less cost, than running even 100,000-ton ships, even if you had to pay no

Would you, therefore, favour a Tehuantepee ship railroad, such as has been proposed ?" "They are building a railroad there now, but not of that kind. I do not believe that the Canal cannot be made workable. There is more sentiment behind the canal than good sense."

IMPERIAL QUARTO ENGLISH AND CHINESE DICTIONARY DICTIONARY. - WITH THE PUNTI AND MANDABIN

PRONUNCIATION. For comprehensiveness and practical service this Work stands unrivalled. All the new words which the Chinese have of late years been compelled to coin to express the numerous objects ir machinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are here given in extense. Each and every word is fully illustrated and explained, forming exercises for students of a most instructive nature. Both the Court and Punti pronunciations are given, the accents being carefully marked on the best principle hitherto attained. The typography Hongkong Office.

Catherine Apcar, Brilish str., 1,730, Belson, Chinese and English type correspond in the size of body, thereby effecting a vust economy of Choysang, British str., 1,194, Bowker, Nov. 29, space, achieving a clearness not previously attained, and dispensing with those wat margin? and vacant spaces which have heretofore churac-

terized Chinese publications. To illustrate the wast scope of the work the following facts are submitted for consideration :-Decima, German str., 794, Schlaikier, Nov. 29, Chalmers' Vocabulary contains about 16,000 Chinese characters, and Modhurst's English and Deuteros, German str., 1,001, Frahm, Nov. 29, Chinese Dictionary about 100.000 whilst this DROZ & CO., work contains more than 50,000 English words Diamante, British str. 1,225, Rattenbury, Nov. and upwards of 600,000, Chinese characters Again, despite all the grammars and other elementary works as yet published, the student of this difficult language absolutely requires examples to display the various applications und equivalents of different words which have one general meaning. Of these examples this work contains more than five times as many as any

For practical purposes the arrangement of the enables a person who understands English to communicate effectively with nativa. wao understand nothing but Chinese. In this respect the Germania, Ger. str., 1,713, Bendixen, Nov. 26, work will be found indispensable to all Europeans residing in China, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted. To parties resident in England and interested in China it cannot but be invaluable occasionally. It comprises upwards of two thousand large
